Trixode Studios: Outbound Sales Playbook

Built for Hussien (CEO/Sales) to take Trixode from $0 to sustainable MRR using 100% organic outbound.

Currency: All financial figures are in **CAD**.

---

1. ICP & Positioning

Strategic Context: We are targeting two very different markets. Local service businesses need reliable revenue and operational relief. B2B SaaS startups need speed, scale, and modern tech stacks. We must position differently for each.

1.1 Target Market A: Local/Regional Service Businesses

Targeting established traditional businesses that need to digitize to survive/grow.

Element	Details	Reasoning
Firmographics	Revenue: $500K - $5M/year Headcount: 5 - 50 employees Geography: BC, Canada & Pacific Northwest Industry: Trades, Legal, Clinics, Agencies	These businesses have cash flow to afford $2.5K-$10K websites or $1K+/mo SEO, but often have outdated digital presence.
Target Persona	Owner, Founder, Managing Partner	At this size, the founder holds the budget and feels the pain of lost revenue directly.
Psychographics & Pain Points	"We are losing jobs to newer companies with better marketing." "I spend too much time answering repetitive customer questions."	They buy *trust and outcomes*, not specific technologies. They want a partner, not just a vendor.
Trigger Events	- Recently hired a marketing manager - Competitor just launched a new site - Expanding to a new location/service	Indicates a readiness to invest in growth and modernizing the brand.
Disqualifiers (Red Flags)	- Revenue under $250K (cannot afford us) - "We just need a quick $500 WordPress fix" - Refusal to involve the decision-maker	Prevents wasting founder time on deals that won't close or will lead to scope creep for low pay.
Alternative	Cheap offshore freelancers (unreliable), DIY platforms like Wix (looks unprofessional), Expensive legacy agencies ($20K+ minimums)	Trixode exists in the "Goldilocks" zone: premium quality, modern tech, but accessible pricing.

1.2 Target Market B: B2B SaaS Startups

Targeting tech companies that need high-end execution without hiring full-time.

Element	Details	Reasoning
Firmographics	Stage: Pre-Seed to Series A Funding: Raised $500K - $5M recently Geography: North America (US/Canada) Tech Stack: React, Next.js, Node	They have literal capital to deploy but are trying to stay lean and avoid expensive full-time senior hires.
Target Persona	Technical Co-Founder (CTO), CEO, Head of Product	They appreciate the modern Next.js/Supabase stack Amir and the team use.
Psychographics & Pain Points	"We need to ship this feature fast but lack frontend capacity." "We need an AI wrapper integrated into our app by next month."	They buy *speed, capacity, and modern architectural alignment*.
Trigger Events	- Just announced Seed/Series A funding - Actively hiring for Senior React/Next.js Devs - Launching a new major product line	Funding = budget. Open reqs = immediate pain we can fill fractionally.
Disqualifiers (Red Flags)	- Bootstrapped with no revenue - Legacy enterprise stacks (.NET/Java) we don't specialize in - Asking for equity instead of cash	We need immediate cash flow. We build in modern JS stacks, not legacy tech.
Alternative	Hiring full-time ($120K+ CAD/yr + benefits), Dev shops in Eastern Europe/LatAm	Trixode offers local timezones, senior talent ($25/hr dev cost enables great margins), and immediate start dates.

---

2. Lead Sourcing System

Strategic Context: Hussien's time is the bottleneck. The goal is to generate 200 highly qualified leads per week (100 Local, 100 SaaS) using a signal-based enrichment waterfall.

2.1 Channels & Tech Stack

Tool	Cost/Mo	Purpose	Reasoning
Apollo.io	~$65 CAD	Primary database & initial enrichment	Best cost-to-value ratio for finding emails and basic firmographics.

Clay	~$200 CAD	Waterfall enrichment & AI personalization	Replaces a human SDR. Automates the deep research and verifies emails to protect domains.
LinkedIn Sales Nav	~$135 CAD	Signal detection & Social Selling	Crucial for finding the "Hiring" or "Funding" triggers for the SaaS ICP.
Smartlead.ai	~$55 CAD	Cold Email Sending & Warmup	Needed to scale volume safely across multiple domains.
Total Stack Cost	**~$455 CAD/mo**		Fits within bootstrapped budget, acts as a full-time AI SDR team.

(Note: If Clay is too expensive initially, Hussien can use Apollo + manual research + ChatGPT, but Clay is highly recommended).

2.2 Weekly Quotas (The Math)

To reach $10K+ MRR quickly, we need to run a high-volume, high-quality math equation:

- **Sends:** 200 emails/week (800/mo)
- **Open Rate Target:** 50%+
- **Reply Rate Target:** 5% (40 replies/mo)
- **Positive Reply/Meeting Rate:** 15% of replies = ~6 meetings booked/mo
- **Close Rate:** 20% = ~1.2 deals/mo
- **Average Deal Value:** ~$6,000 CAD
- *Result: ~$7,200 CAD New Revenue/Month.*

2.3 Research & Enrichment Checklist (Clay/Manual)

For every lead before reaching out, the system/Hussien MUST find:

1. **[ ] Verified Email Address:** Bounce rate must be < 2%.
2. **[ ] First Name & Company Name:** Cleaned (e.g., "Apple" not "Apple Inc. LLC").
3. **[ ] Trigger Event:** (e.g., "Saw you just raised a Seed round" or "Noticed you are hiring for a React dev").
4. **[ ] Current State Hypothesis:** (e.g., Local biz: "Your current site loads slowly on mobile." / SaaS: "You likely have a 3-month backlog for your engineering team.")

---

3. The Outbound Scripts (Core Framework)

We use the 3-Line Cold Email Framework (under 80 words).

1. **Hook (Pain/Observation):** Specific observation based on the trigger event.
2. **Meat (Proof/Offer):** One sentence of credibility or specific result.
3. **CTA:** Low-friction question.

3.1 Template A: Local Service Business (Website/SEO)

Trigger: Poor mobile site, slow load times, or expanding service area.

Subject: mobile site / [Company]

Body:

> *Hey [First Name],*
>
> *Was looking for [Service] in [City] and noticed your mobile site takes a few seconds to load—usually means you're dropping 30%+ of potential client traffic before they even see your work.*
>
> *We just helped [Similar Local Biz] rebuild their site and they've seen a 40% jump in organic leads in the last 2 months.*
>
> *Open to a quick 5-min video showing exactly what's slowing [Company] down?*
>
> *Best, Hussien*

3.2 Template B: B2B SaaS (AI/Dev Capacity)

Trigger: Hiring a React/Next.js developer or recently funded.

Subject: frontend capacity for [Company]

Body:

> *Hey [First Name],*
>
> *Noticed you're actively hiring for a Senior Next.js Developer. Ramping up a new dev usually takes 2-3 months before they're pushing meaningful code to production.*
>
> *My team at Trixode works exclusively in Next.js/Supabase and can start clearing your frontend backlog tomorrow. We recently helped [Similar SaaS] ship their AI feature 4 weeks ahead of schedule.*
>
> *Worth a quick chat to see if we can help bridge the gap while you hire?*
>
> *Cheers, Hussien*

---

4. Cold Email Sequence (4-Touch)

Strategic Context: First email captures 58% of replies. The sequence must be spread out over ~2 weeks. We test timeline-based narratives vs problem-based hooks.

The Sequence Architecture

Step	Day	Goal	Structure / Content
Email 1	Day 0	The Opener	**Hook:** Timeline/Trigger observation. **Proof:** 1-sentence case study/metric. **CTA:** Low-friction ask (e.g., "Open to hearing more?").
Email 2	Day 3	The Value Add	**Angle:** Share a specific insight, framework, or asset (e.g., website audit, architectural diagram). **CTA:** Request to share it.
Email 3	Day 7	Social Proof	**Angle:** Focus entirely on a similar company's success. **Example:** "We just helped [Competitor/Similar Biz] handle X... thought it might be relevant to your Q3 goals."
Email 4	Day 12	The Breakup	**Angle:** Permission to close the file. Shifts the dynamic. **Example:** "Usually when I don't hear back, it means this isn't a priority right now. Should I close this out?"

---

5. LinkedIn DM Sequence

Strategic Context: LinkedIn requires a conversational approach, not pitching. We use the "Content-to-Conversation" framework and multi-channel layering alongside email.

5.1 The Connection Strategy

Never pitch in the connection request.

- **Template:** "Hey [Name], saw your post on [Topic] / noticed you are building out the tech team at [Company]. Would love to connect."
- *Alternatively, connect with no note. It often converts higher.*

5.2 The DM Cadence (Post-Connection)

Step	Timing	Purpose	Script Template
DM 1	Instantly upon accept	Value-First / Observation	"Thanks for connecting [Name]. Loved your recent post on X. Out of curiosity, are you guys still using [Tech Stack] for the new build?"
DM 2	2 Days Later	The Soft Pitch (Asset Lead)	"Was thinking about what you mentioned. I actually put together a quick architectural teardown on how to optimize [Tech Stack] for speed. Worth sending over?"
DM 3	5 Days Later	Voice Note (Alternative)	*30-second audio message:* "Hey [Name], Hussien here. Didn't want to flood your inbox. Just wanted to see if you were open to a 10-min intro chat about scaling your frontend. No worries if not a priority right now."
DM 4	10 Days Later	The Bump	"Hey [Name], any thoughts on the above? Complete radio silence is totally fine too if timing is off!"

---

6. Video Outreach System

Strategic Context: Video drastically improves conversion (up to 3x) but is time-consuming. We only use video for Tier 1 prospects or as a "Value Add" in Email 2.

6.1 The Stack & Process

- **Tool:** Loom (for bespoke 1-to-1 videos) or Sendspark/Tavus (for AI personalized scale).
- **Format:** Screen recording of their website/app with Hussien's face in the bubble.
- **Length:** Maximum 60-90 seconds.

6.2 The "Made This For You" Framework

Phase	Duration	Script/Action
1. The Hook	0:00 - 0:10	"Hey [Name], I'm on your site right now. Specifically looking at [Specific Page/Feature]. Notice how it [Pain Point]?"
2. The Audit	0:10 - 0:40	Outline 1-2 specific, undeniable flaws or areas for optimization. Be objective and helpful, not insulting.

3. The Fix	0:40 - 0:60	Show how Trixode would fix it (or show a successful example from another client).
4. The CTA	0:60 - 0:75	"I don't want to take up more of your time here. If you're open to fixing this, I have a few more ideas. Worth a 10-minute chat securely?"

Thumbnail Strategy: The video thumbnail must be an animated GIF or an image showing *their* website with a whiteboard or text overlay saying "For [First Name]".

---

7. Discovery Call Script (15-Minute Framework)

Strategic Context: The goal of the first call is *not* to sell. It is to qualify BANT (Budget, Authority, Need, Timeline), uncover the "Current State" vs "Desired State" gap, and secure the next step (Proposal/Deep-Dive Demo).

The "GAP" Call Structure

Phase	Time	Script / Framework
1. The Intro & Agenda	0-2 min	"Thanks for jumping on. To keep this to 15 mins, my goal today is just to understand how you're currently handling [Pain Point], share a bit about how we solve it, and see if it even makes sense to keep talking. Sound fair?"
2. Current State (Pain)	2-7 min	"I noticed [Trigger/Signal]. Walk me through how you're currently managing [Frontend Dev/Website Leads]." *Listen. Dig deeper: "How is that impacting the rest of the team/revenue?"*
3. Desired State (Goal)	7-10 min	"If we could wave a magic wand, what would this process look like in 3 months? What metric are you actually trying to move?"
4. The Bridge (Pitch)	10-13 min	"Based on what you said, we can actually help. We are a Senior dev team out of Victoria. We do [Specific Solution] and usually cut [Time/Cost] by X%. Specifically for you, we would [1 Sentence Execution Plan]."
5. The Close (Next Steps)	13-15 min	"I don't want to guess on pricing or timelines without mapping it out. Do you have 30 mins next Tuesday for me to walk you through a custom roadmap and pricing for this exact build?"

---

8. Objection Handling Scripts

Strategic Context: Objections are just unasked questions. We use the **Acknowledge -> Clarify -> Reframe -> Proof -> Close** framework.

Common Objections & Responses

Objection	The Reframe	Script
"It's too expensive."	Shift from *cost* to *ROI/Cost of Inaction*.	"I hear you, it's a real investment. Just to clarify, is it a cash flow issue today, or a question of whether this will actually generate a return? Because [Similar Client] felt the same way, but the new site brought in $X in new

		jobs month one, making the site free. If I could guarantee that, would price still be the blocker?"
"We are handling this in-house / hiring."	Shift to *speed and opportunity cost*.	"Makes total sense. Hiring is the right long-term play. But it usually takes 3 months to hire and ramp a senior dev. We can start your backlog tomorrow. Would it make sense to use us as a bridge just to get the current roadmap shipped?"
"Bad timing, call me in 6 months."	Uncover the *real* priority.	"Totally fair. Just so I understand, what's the milestone you're trying to hit before tackling this? Is it a focus issue, or just not a priority right now?" *(If it's focus, step back. If it's a fake objection, this exposes it)*.
"We already work with an agency."	Shift to *specialization/audit*.	"Most of our best clients already had an agency. I'm not looking to replace them today. But since we specialize *only* in [Next.js / Local Conversion], would you be open to a free 5-minute audit just to make sure they aren't missing anything critical?"
"Send me some info." (Brush off)	Secure the micro-commitment.	"Happy to. I have a lot of info though, and I don't want to spam you. What specifically are you most interested in seeing—pricing, case studies, or the technical stack?"

---

9. Offer Framing ($100M Offers Strategy)

Strategic Context: We do not sell "Web Development" or "Developer Hours". We sell business outcomes (Leads, Shipped Features, Speed). We use Value-Based Pricing and clear Value Stacks.

9.1 Local Service Business Offer

Core Offer: "The 24/7 Sales Engine"

- **The Promise:** A high-converting, SEO-optimized website that acts as your best salesperson, generating exclusive local leads.
- **The Value Stack:**
  - Custom Design & Build (Value: $5,000)
  - Local SEO Foundation Setup (Value: $1,500)
  - Lead Capture Forms & CRM Integration (Value: $1,000)
  - Mobile Speed Optimization (Value: $500)
- **Total Value:** $8,000
- **Actual Price:** $3,500 - $6,000 (Based on scope).
- **The Guarantee (Risk Reversal):** "If the site doesn't load in under 2 seconds, we rebuild the architecture for free."

9.2 B2B SaaS Startup Offer

Core Offer: "Fractional Senior Product Team"

- **The Promise:** Ship your React/Next.js backlog 2x faster without the overhead, benefits, or ramping time of a full-time hire.
- **The Value Stack:**

- **Total Value:** High enterprise velocity.
- **Actual Price:** $4,000 - $10,000/mo retainer tier.
- **The Guarantee (Risk Reversal):** "You can pause or cancel the retainer with 7 days notice. No 12-month lock-ins."

---

10. The Follow-Up System

Strategic Context: 80% of sales require 5 follow-up touches after the initial meeting. Never "just check in." Always add value.

Post-Discovery / Post-Proposal Cadence

Touchpoint	Timing	Format	Content / Script
Touch 1	Same Day	Email	**The Recap:** "Great chatting today. As promised, attached is the proposal/roadmap. To summarize, we are solving [Pain 1] and [Pain 2] over the next 4 weeks."
Touch 2	Day 3	Value Email	**The Asset:** "Was thinking about the [Feature/Page] we discussed. I put together a quick wireframe/loom showing how we'd structure the database/layout to handle your traffic safely."
Touch 3	Day 7	Social Proof	**The Case Study:** "Wanted to share this quick case study from [Similar Client]. They had the exact same tech debt issue, and we cleared it in 14 days."
Touch 4	Day 14	Voice Note / DM	**The Bump:** "Hey [Name], I know things get busy. Just bumping this in your inbox. No rush on my end, just wanted to make sure you had it."
Touch 5	Day 21	The Breakup	**The Close-Out:** "Hey [Name], usually when things go quiet it means priorities shifted. I'll close out your file on our end so I stop bugging you. Let me know if you ever want to reopen it!"

---

11. Sales Metrics Dashboard (The Math)

Strategic Context: You cannot improve what you don't measure. We track Leading Indicators (what predicts revenue) and Lagging Indicators (what happened).

Weekly Trixode Scorecard

Metric Type	Metric	Target	Why It Matters
Leading	**Volume:** New Contacts Sourced	200 / week	Feeds the top of the funnel. No contacts = no emails.
Leading	**Activity:** Outbound Sent (Email/LI)	200 / week	The actual execution of the strategy.

Leading	**Quality:** Reply Rate	> 5%	If it dips below 3%, the hook or ICP is wrong.
Lagging	**Conversion:** Meetings Booked	5-8 / week	The bridge between marketing and sales.
Lagging	**Pipeline:** Pipeline Created ($)	$15,000 / wk	Ensures the meetings are actually qualified and capable of buying.
Lagging	**Revenue:** Win Rate	> 20%	If below 15%, the objection handling or presentation needs work.
Efficiency	**Time-to-Response**	< 1 hour	Leads cool off rapidly. Fast response times 2x conversion.

---

12. Hussien's Weekly Calendar (Time Blocking)

Strategic Context: As Founder/CEO doing sales, momentum is everything. Do not let client work bleed into outbound time.

The Outbound Operating Rhythm

Day	Morning block (9AM - 11AM)	Afternoon Block (1PM - 4PM)	End of Day (4:30PM - 5PM)
Monday	**Sourcing Sprints:** Build weekly list of 200 leads in Clay/Apollo. Load to sequence.	**Client Work:** Deep work on active Trixode builds (Next.js/Supabase).	**Inbox Zero:** Clear all outbound replies. Route positive ones to schedule.
Tuesday	**Discovery Calls:** Stack initial sales calls back-to-back. (Prospects answer most on Tues/Wed).	**Proposals/Follow-ups:** Send out custom roadmaps/proposals from morning calls.	**Inbox Zero:** Respond to objections and follow up on pending deals.
Wednesday	**Client Work / Strategy:** Full focus on delivering current projects and CTO sync with Amir.	**Discovery Calls:** Second block for initial calls and deep-dive demos.	**Inbox Zero:** Clear all outbound replies.
Thursday	**Content & Assets:** Record personalized Video Outreach (Loom). Create social content (LinkedIn).	**Client Work:** Deep work on active Trixode builds.	**Inbox Zero:** Clear all outbound replies.
Friday	**Sales Review:** Measure the Week's Scorecard. Update CRM. What worked/failed?	**Admin & Planning:** Send invoices. Prep next week's sourcing criteria.	**Hard Stop:** Close the laptop.

End of Playbook.

Trixode Studios - Built for execution.
